A New Week at the Camp: Full of Energy, Learning and Big Wins

We're happy to share some highlights from an exciting second week at the cyber security youth camp a week packed with deep learning, fun outings, and inspiring stories. Our students didn't just learn new skills they built confidence, explored real-world challenges, and came one step closer to becoming the future leaders of cybersecurity.

Where Ideas Take Off

Innovation was in the air this week, as our students continued working on their final projects. From tackling phishing scams to strengthening data privacy, they turned cybersecurity theory into hands-on solutions for real digital challenges. It's been amazing to see their ideas come to life.

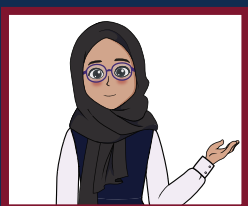

Behind the Scenes at Ooredoo

Our field trip to Ooredoo gave students a closer look at how cybersecurity works in the real world. They learned about careers in the field, discussed the latest threats (especially from AI), and joined a high-energy quiz challenge. It was a powerful way to connect classroom learning to real world action.

Wisdom from the Experts

This week, we hosted inspiring guest sessions from some of Qatar's top experts, **Dr Abdulrahman Al-Harami, Ms Laila Al-Ali – Educational Consultant, Mr Nayef Al-Shammari – Cybersecurity Expert**, They shared stories from their careers, gave practical advice on staying safe online, and answered all our students' questions. The sessions were full of insight and inspiration and our students were left buzzing with ideas.

"Our trainers have amazing skills and deep knowledge in cybersecurity. They didn't just teach us, they showed us how to use tools that protect us in real life, like checking if our passwords have been leaked and how to make them stronger. Their focus on privacy and encryption was eye-opening!"

Sara Al-Doosari, Participant

We're incredibly proud of how far our students have come in just two weeks. Their energy and determination push us all to aim higher. We can't wait to see what the next week holds stay tuned for more updates.
