CASE FILES: اسم المشروع

أعضاء الفريق: فاطمة الأنصاري، شهد محسن، نعيمة الباهلي، الجازي الكواري

Every clue matters. Every decision counts

The Solution

CASE FILES is an interactive cybersecurity game where students become cyber investigators.

Players collect evidence, analyse clues, solve challenges, and create a prevention plan while learning how cyberattacks happen and how to stop them.

Our Methodology

How It Works

Mission: Receive a cyberattack case.

Investigate: Collect and analyse digital evidence.

Solve: Complete cybersecurity challenges and capture flags.

Prevent: Create a security plan to stop future attacks.

Achieve: Complete the case and earn a certificate.

The Problem

Students use technology every day, but many are unaware of cybersecurity risks.

Common threats include phishing, weak passwords, fake websites, and online scams.

Traditional learning often focuses on theory instead of hands-on experience.
